Maybe even better than free.

Keep your files private, or send your download links only to friends or family. Just upload the file you want to share with your friends and we send you a download link to your file. There are no restrictions on the number of times a file can be downloaded. Our service is completely free for everyone. It is also allowed to link to the download page from websites and communities. When you use file, you avoid storing the file you're sending in your cloud storage ormail server. The cost of that data transfer is covered by your internet service or the data plan on your phone. Simply upload your file and share the link. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. You decide who you want to share your files with. Why pay storage fees for a file that you just wanted to send to a friend or colleague?
